

Action Tracker WEB

Notifications

To improve the user experience of the Action Tracker system, our team has added a notification feature that will be displayed on your PC when you need to perform a Check IN/Check OUT or Pause Stop. Upon logging into the system, you will be prompted to enable this functionality:

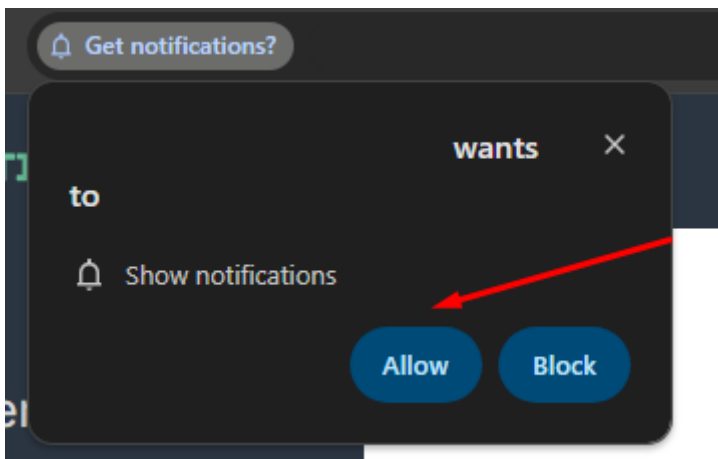

We use notifications!

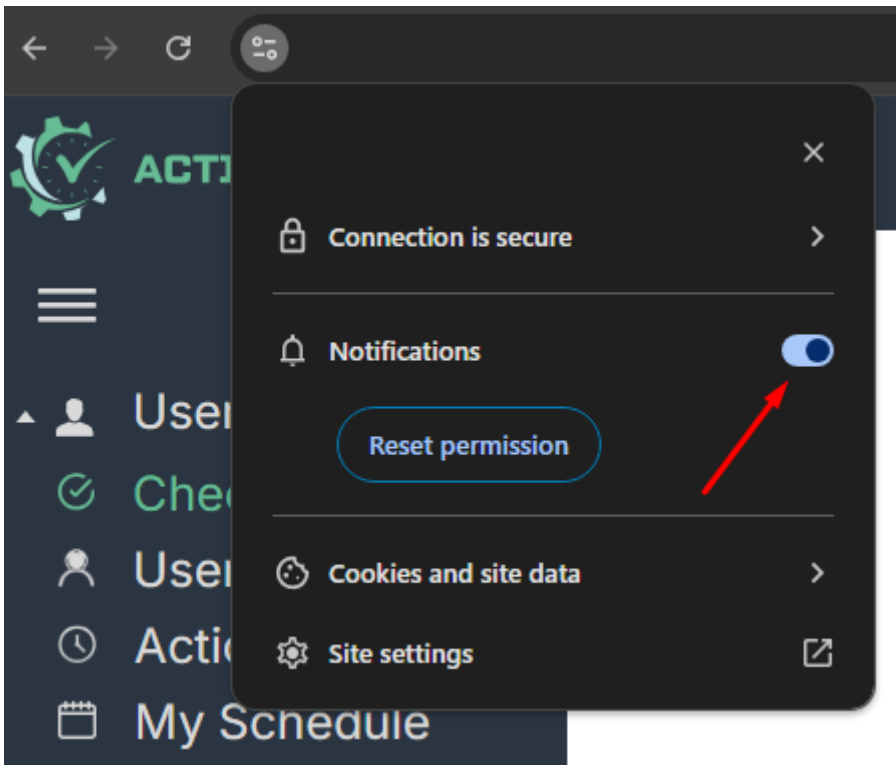

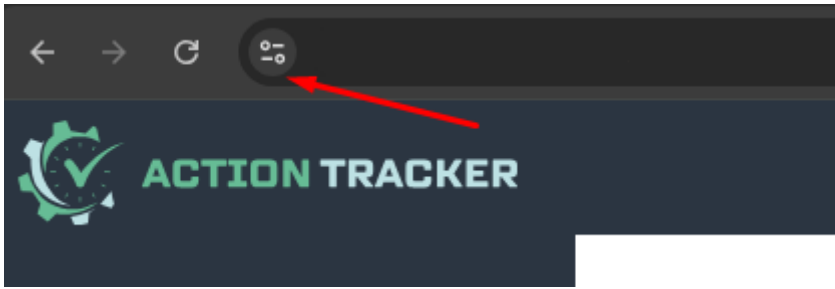

Please accept notifications to get reminders over your working hours

OK

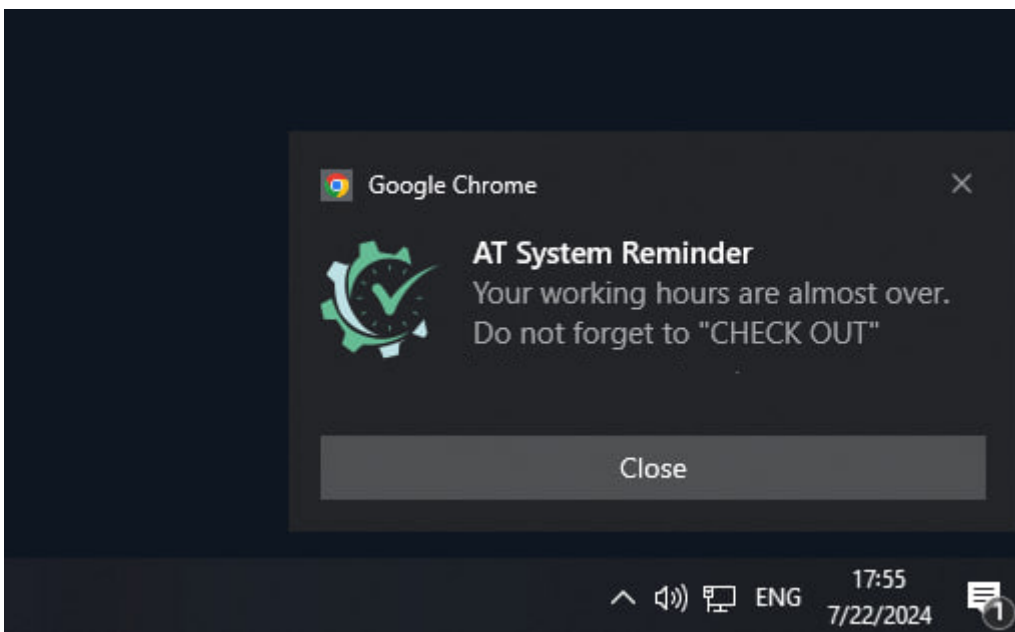

After pressing the OK button, your browser will prompt you to enable notifications from the website a-tracker.net:

If for any reason this did not happen, you can manually enable or disable the notification feature in the website settings:

Once you have configured notifications, the system will be able to send you reminders to perform Check IN or Check OUT as needed.

Revision #14
